PROFESSIONAL SUMMARY

B.Tech CSE graduate pursuing PGDM in Data Science & Applied AI with hands-on experience in Machine Learning, Generative AI, and AI Agent development. Built scalable AI-powered applications using OpenAI API, LangChain, and Streamlit. Experienced in data scraping, automation, ETL pipelines, and deploying intelligent systems that reduce manual effort and improve operational efficiency.

TECHNICAL SKILLS

Programming: Python, SQL, Bash (Basics)
Machine Learning & AI: Scikit-learn, TensorFlow, PyTorch, Deep Learning, Model Evaluation, Feature Engineering, OpenAI API, LangChain, Hugging Face, RAG Pipelines, Prompt Engineering
Data Engineering: ETL Pipelines, Data Cleaning, Data Transformation, Pandas, NumPy, Data Modeling, Snowflake (Basics), PostgreSQL, MySQL
Big Data & Processing: Apache Spark (Basics), PySpark (Basics), Hadoop (Fundamentals)
MLOps & Deployment: Streamlit, Flask, REST APIs, Docker (Fundamentals), AWS (EC2, Lambda, S3 – Basics), CI/CD (Fundamentals)
Generative AI & LLM Systems: AI Agents, Retrieval-Augmented Generation (RAG), Vector Databases (FAISS – Basics), LLM Integration
Data Visualization: Power BI, Matplotlib, Seaborn
Version Control & Tools: Git, GitHub, Jupyter Notebook, VS Code

INTERNSHIPS

AI Intern – Imarticus Learning (Applied AI Program) 2025 – Present

- Developed an automated LinkedIn data scraping system extracting experience data of 1000+ professionals.
- Reduced manual candidate profiling effort by 80% through Python-based automation.
- Built structured datasets for analytics and AI-driven insights.
- Implemented data cleaning and transformation pipelines for downstream ML tasks.

AI/ML Intern – VertEx Plus Technologies Ltd. May 2025 – July 2025

- Built CNN-based pole detection model achieving 95%+ accuracy.
- Automated preprocessing pipeline for 10,000+ images reducing manual effort by 70%.
- Improved detection efficiency by 60% via model optimization and validation.

Data Science Intern – Celebal Technologies May 2024 – Aug 2024

- Processed and analyzed 500K+ records performing ETL and feature engineering.
- Designed Power BI dashboards reducing business decision time by 30%.
- Improved data quality metrics by 20% through structured validation processes.

FREELANCE EXPERIENCE

Freelance AI & Web Application Developer

- Developed custom AI-powered web applications integrating LLMs for automation and intelligent workflows.
- Built end-to-end web solutions including frontend, backend, and AI model integration.
- Implemented API-based automation tools to streamline client operations.
- Delivered scalable AI features such as chatbots, data analysis tools, and workflow automation systems.

KEY PROJECTS

AI-Based Job Preparation & Search Platform

- Developed GenAI-powered career assistant using OpenAI API and LangChain.
- Integrated live job data via RapidAPI with contextual RAG-based responses.
- Designed modular backend supporting 50+ concurrent users.
- Improved user engagement by 45% during prototype testing.

Auto EDA Generator (AI Data Analysis Tool)

- Built automated EDA system generating reports within 15 seconds per dataset.

- Integrated OpenAI API to generate natural-language insights.
- Reduced manual exploratory analysis effort by 80%.

Violence Detection using InceptionV3 + LSTM

- Designed hybrid CNN + LSTM model achieving 92% accuracy.
- Improved temporal pattern recognition using motion-sequence integration.
- Evaluated model using precision (0.88) and recall (0.90).

EDUCATION

PGDM – Data Science & Applied AI 2025 – Present
Imarticus Learning, Bangalore
B.Tech – Computer Science and Engineering 2021 – 2025
Poornima University — CGPA: 7.0

CERTIFICATIONS

Generative AI with Agentic AI – Udemy
Center of Excellence in Data Science – Celebal Technologies
Data Science Internship – Celebal Technologies
